DETAILED ACTION

1. This action is in response to the RCE filed on 3/23/2009.
2. Claims 1-37 and 39-47 are pending (claim 38 was canceled).
3. Claims 14-19, 22-26, 32, 34-35, 39, and 46-47 are allowed.
4. Claims 1-13, 20-21, 27-31, 33, and 36-37 are currently rejected under 35 U.S.C. 101.

Claim Rejections - 35 USC § 101

5. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim(s) 1-13, 20-21, 27-31, 33, and 36-37 is/are rejected under 35 U.S.C. 101 as not falling within one of the four statutory categories of invention. While the claims recite a series of steps or acts to be performed, a statutory “process” under 35 U.S.C. 101 must (1) be tied to particular machine, or (2) transform underlying subject matter (such as an article or material) to a different state or thing. See page 10 of In Re Bilski 88 USPQ2d 1385. The instant claims are neither positively tied to a particular machine that accomplishes the claimed method steps nor transform underlying subject matter, and therefore do not qualify as a statutory process. The method **claims 1 and 20** including steps of ... are broad enough that the claim could be completely performed mentally or manually without a machine nor is any transformation apparent.

In addition, **claims 20, 21, and 33** are rejected under 35 U.S.C. 101 because the claimed invention lacks patentable utility. The claims do not produce a useful, tangible and concrete

result. The claims only claim a method of processing a received orthogonal frequency division multiplexed signal. The steps merely manipulate signals and/or abstract ideas that are not concrete or tangible.
